

Raxwell®

N95 DISPOSABLE RESPIRATORS

DURABLE PROTECTION, COMFORTABLE DAILY WEAR.

Disposable respiratory protection includes NIOSH-certified respirators and general-purpose disposable masks. Both are single-use devices that cover the nose and mouth, using barrier or filtration materials to maintain hygiene and reduce exposure.

SKU	Material	Filter Efficiency Level	Exhalation Valve	Nose Clip	Color	Packaging
RSR95	PP/Melt Blown / PP	>95%	No	Yes	White	25 Pcs/Box 36 Boxes/Case

RSR851	PP/Melt Blown/PET	>95%	Yes	Yes	White	18 Pcs/Box 18 Boxes/Case

RSR95

UPC
810154965496

The RSR95 is a three-layer fold-flat respirator built with PP and melt-blown filtration media to deliver $\geq 95\%$ particulate efficiency. Its lightweight structure, integrated nose clip, and comfortable ear-loop design provide dependable sealing performance for routine dust, mist, and airborne particle exposure. Ideal for daily workplace protection requiring reliable, disposable filtration without added bulk.

RSR95H

UPC
810154965502

The RSR95H uses the same PP/melt-blown construction as the standard RSR95, with an ergonomic fold-flat profile designed for improved facial conformity. The internal nose clip supports stable sealing across extended wear, making it suitable for general industrial environments, facility work, and high-volume user rotation. Provides $\geq 95\%$ filtration efficiency in a compact, easy-store format.

RSR960B

UPC
810154965519

The RSR960B combines PP, melt-blown, and ES layers in a structured black fold-flat respirator engineered for $\geq 95\%$ filtration performance. Its reinforced shell and adjustable nose clip maintain shape under heat and humidity, while soft ear loops ensure comfortable day-to-day use. Well-suited for manufacturing, maintenance, and dusty workplace conditions where a low-profile protective option is preferred.

RSR960H

UPC
810154965526

The RSR960H is a lightweight, fold-flat respirator using PP and melt-blown filtration to achieve $\geq 95\%$ efficiency in non-oil particulate environments. Its contoured shape, integrated nose clip, and flexible ear loops support a secure yet breathable fit. A dependable option for facility operations, public-facing work, and applications requiring portable, disposable respiratory protection.

RSR850

UPC
810154965472

The RSR850 is a molded-cup N95-style respirator constructed with PP/melt-blown/PET media for $\geq 95\%$ filtration efficiency. The rigid shell maintains structural integrity during extended tasks, while the adjustable nose clip enhances seal quality and reduces fogging. Designed for industrial, construction, and maintenance settings where consistent, high-filtration respiratory protection is required.

20 PCS/BOX | 18 BOXES/CASE

RSR851

UPC
810154965489

The RSR851 adds an exhalation valve to the durable molded-cup design for cooler, lower-resistance breathing during demanding tasks. Built with PP/melt-blown/PET materials and rated for $\geq 95\%$ filtration efficiency, it offers stable protection in dusty or high-heat environments. Ideal for extended-shift work where comfort and airflow are critical to user performance.
